

#### 14) If you could change one thing about the school facilities, what would it be?

Grade configuration

Hhes needs an overhaul and needs to be rethought out to consider today's needs.

Not sure

Interior 21st century improvements to classrooms (STEM rooms, advanced technology, etc.)

No portables

Modernization

Update with modern tech

Portables

Get rid of portables

Update and make more classrooms so the class sizes aren't so large

build a new school for k-5

Conditions

Pre-k - 5 needs new or fully renovated facilities

A whole revamping of BHS.

removed portables

SPACE FOR ALL! No modular buildings, lockers and storage for all, small class sizes with soace for every teacher and specialist.

Updating from top to bottom

K-5 Elementary

Upgrade to be current with up and coming technology

The fact that people in this town do a lot of lip service and little action. If the schools aren't cared for, in theory neither are our kids. They are the future of brookfield and should be treated and respected as such

There are too many things...I feel they should be maintained, they should not have cement walkways that are crumbling or driveways with potholes big enough to swallow a car...

State of the art

Update all systems

Environmental factors, like mold

Making sure each building was up to code regarding safety

Getting 5th grade out of WMS

Move 5th to elementary

Getting rid of the portables

See above

More technology based classrooms and no portables

Bring 5th grade to the elementary level so we can remove the portables at Whisconier

Updated facilities, lockers at hs

Renovations to HHES or permanent addition in lieu of portables at WMS

Bigger classrooms with up to date technology

Cleanliness

No portables!

Eliminate portables

More spave to accomadate all students. My child dosebt have a locker in WMS, because there are not enough for all the students.

Update them and modernize.

a K to 5 school

Security of the schools. Not all outside doors close and lock.

Stop the bandaid fixes.

Combine Center School and HHES at one site

Build a k-5 and close Center

New facilities

Huckleberry

Safety

Portable or temporary classrooms should not be allowed.

Bigger

Make them more cheerful

Update mechanical systems

Get rid of the portables
make them modern
Modernize
New schools. Funded maintenance.
See above.
Building improvement at HHES
A school campus like Bethel has, though that is impractical at this point.
Move 5th grade to the elementary level.
Solar power
I would remove all portable classrooms immediately. They are temporary structures and deteriorate quickly causing safety and health issues for students and teachers. In lieu of temporary classrooms, I suggest the school district lease space in town to house either specific grades (eg, grade 5) or populations (special needs students) until a new building(s) is/are completed. For example, Sieman's has vacant space that could be adapted for teaching.
?
Its complex layout
The quality of the space the children spend their day in. Currently it is too old, dated and
New k-5 (or even k-6) elementary school. Would allow for easier upgrade and removal of portables at middle school
Permanent structures that are not portables
Modernize outdated buildings (HHES and CS)
Updated material and curriculum got hand in hand cannot chose one.
Huckleberry is completely deteriorated
The leadership
I would close Center School
Update the entire schools to keep up w technology
Update the buildings and get ahead of the ball for the large amounts of new students that will be coming due to all of the new apartments in the town.
Overall condition/ updates needed
adding air conditioning to all locations
Modernine them.
Grade Configuration
Update/add more classrooms
Stop using 'band-aids' in repairing old/outdated items and replace as needed (Heating/cooling systems are inconsistent, plumbing repairs and mold)
See above. Reorganize systems into K-1 school, 2-5 school, 6-8 school, and 9-12 school.
Make all on one campus with police station
going from old and dingy to new and clean
How dated they are
wider hallways for safe travel and to maintain lockers. Classroom lockers disturb the learning environment in a middle school.
Add outdoor bathroom at BHS
The heating system.
The portables
Heating and AC units to be like those off the computer labs. The option of High, low, off, heat and AC. Save money by not over heating or cooling. Current system DOES NOT WORK LIKE THE COMPUTER LABS. FULL BLOWN AC ON UNTIL END OF NOVEMBER AND MUST ASK TO HAVE IT TURNED OFF. THIS IS A WASTE OF MONEY.
Better playgrounds
Moving Grade 5 from middle school to Huckleberry school
Bathooms
Restrooms
Location
Proper heating and cooling would be great to ensure a comfortable learning / working environment
I'd undo what appears to be a huge lack of forethought and back planning by our predecessors.
MORE BATHROOM FOR ADULTS
Portable elimination
Everything- all needs huge improvement.
space
No mold, new bathrooms
